

Nairobi National Park Safari – Adventure at City's Edge

📍 Nairobi

Benefit from a pickup at your hotel, and then take an early morning game drive through the Nairobi National Park. After a short 15-minute ride from Nairobi's city center, get ready to see the wildlife tracks of the Nairobi National Park at sunrise. Due to the limited size of the National Park, there are no elephants as they require a larger living habitat. First, learn about the 3 main ecosystems in the Nairobi National Park consisting of the dry forest western side, the Savannah grasslands, and the boundary riverine ecosystem. Then, discover an impressive array of animals including lion, cheetah, leopard, giraffe, ostrich, hippo, rhino, buffalo and other game animals. Experience the wildlife at the best time of the day as the animals are still very active. Watch some of the big cats returning from a night of hunting. After this, get delivered back to your hotel in Nairobi which marks the end of the tour.
